INVESTMENT POLICY

Belgravia Beta invests in European equities. The investment objectives are to achieve positive returns and a Sharpe ratio higher than the Stoxx 600 with a volatility of returns lower than the Stoxx 600. The company varies its equity exposure at its discretion, investing the balance in money market instruments.

PORTFOLIO MANAGER COMMENTS

In May Belgravia Beta rose by 1.1% with an average beta of 0.01 against the Stoxx 600, which returned 2.64%. Equity markets continued recovering from the start of the year correction, fuelled by further monetary stimulus by the ECB and expectations of delayed rate increases by the FED.

In May, Belgravia Beta had a good performance due entirely to positive stock picking, given the nil market risk held throughout the month. Best gains came from financials (BNP, Amundi), staples (Marine Harvest, Ontex), healthcare (Merck, Fresenius) and telecoms (Orange, Drillisch). Individually, Saft excelled.

As of the 31st of May, Belgravia Beta had a net equity exposure of 8.5% and a beta of 0.01 against the Stoxx 600.
